Subject: FW: Valuable Student Resources for the 2013 Main Residency Match!

I'm attaching some information about the NRMP, and resources they have for you.

Interesting information includes:

- four webcasts about the Match (couples, rank order list, how the algorithm works, and policy)
- AND the 2012 program director survey (how they decide to grant interviews and rank, how they use USMLE scores, and the % of slots they fill prior to the release of MSPE. Note that, since the MSPE is going out a month earlier this year and you applied two weeks later, the latter % may change significantly.

You might not need to look at this information now, and I will do a 'Match' class meeting in January, but here it is!!
