

Unique Characteristics

Mary was selected as a senior in high school to join the Conley Preprofessional Scholars Program, a program offering assured medical school admission to a very limited number of exceptional high school seniors (and a few college freshmen), provided they maintain undergraduate program requirements. In recognition of her academic accomplishments, Mary was elected to Alpha Omega Alpha (AOA) Medical Honor Society her junior year and serves as President of the local chapter. Additionally, she has received the Alpha Omega Alpha General Scholarship. She was president of her medical school class during her first year and was a member of the Medical Student Advisory Committee. She was awarded the Society for Academic Emergency Medicine Award for demonstrating excellence in the specialty of emergency medicine.

Mary passed the United States Medical License Examination (USMLE) Step 1 with a score of 263.

Unique Characteristics

Jim has held several leadership positions during medical school including President of SIGHT (Students Interested in Global Health for Tomorrow) for two years and class representative to the Curriculum Board during his third year. Currently, he is the elected student representative to the MU2020 Steering Committee, a taskforce charged with building on the current mission and strategic plan for the School of Medicine. In addition, he is an active member of the Wilderness Medical Society and Physicians for Social Responsibility (PSR). During his first year, Jim presented a poster session at our Student Research Day. Following his second year, he was selected for a Post-Sophomore Fellowship (PSF) in the Department of Pathology. Jim was invited to speak to undergraduates and medical students about his research experiences as a mentor in the Summer Research Fellowship Program. Currently, he is conducting research with a faculty member in the Department of Pathology. Jim had an opportunity to present a poster at the annual American Society of Clinical Pathology (ASCP). His research also culminated in an ASCP published article based on his infectious disease pathology research.

Outside of school, Jim enjoys mountain biking, camping, water skiing, judo, and pencil drawing. He was awarded first place in the School of Medicine Art Contest during his first year. In recognition of his academic accomplishments, Jim was recently elected to Alpha Omega Alpha (AOA) medical honorary society.

Unique Characteristics

Maureen has actively participated in the American Medical Women's Association and Students Interested in Global Health for Tomorrow. Maureen's leadership roles included serving as co-chair of the publicity committee for MULation, a yearly banquet that provides students the opportunity to discuss specialties with physicians from many different fields. She was a representative of Students Interested in Global Health for Tomorrow and spent part of one summer of medical school in Venezuela working at a rural hospital.

Maureen passed the United States Medical Licensing Examination (USMLE) Step 1 with a score of 235.

Unique Characteristics

Stephen has been active in research. He spent time doing clinical research on the surveillance of thyroid cancer patients. As a result of this study, Stephen authored a paper, which has been submitted for publication. Peter also participated in research at the University of Michigan, which involved testing virtual dissection software designed to facilitate the interpretation of virtual colonoscopy.

After his first year, Stephen spent the summer participating in the High School Mini Medical School program. As a counselor/tutor he provided a positive influence on high school students aspiring to be doctors. Outside of school, Stephen enjoys camping, swimming and reading
