Subject: M3 Class Meeting-Registration

Good morning,

Reminder that we have a class meeting on Feb. 24, 12-1pm in Acuff—discussing registration and away rotations/VSAS. AOA members will also be there with a short presentation and Q&A.

We will be live streaming the meeting for students who are on rural track and "offsite". Here are the instructions. If you have technical issues please call 573-882-3060 and say that you are trying to view the "M3 meeting" on the Watch2.more.net link. This might speed up the call.

In the meantime, the M4 Procedures Guide (via your student home page) can assist with questions/M4 processes.

Amy

The conference will be available to select once the conference time has started. Go to http://watch2.more.net in a web browser.
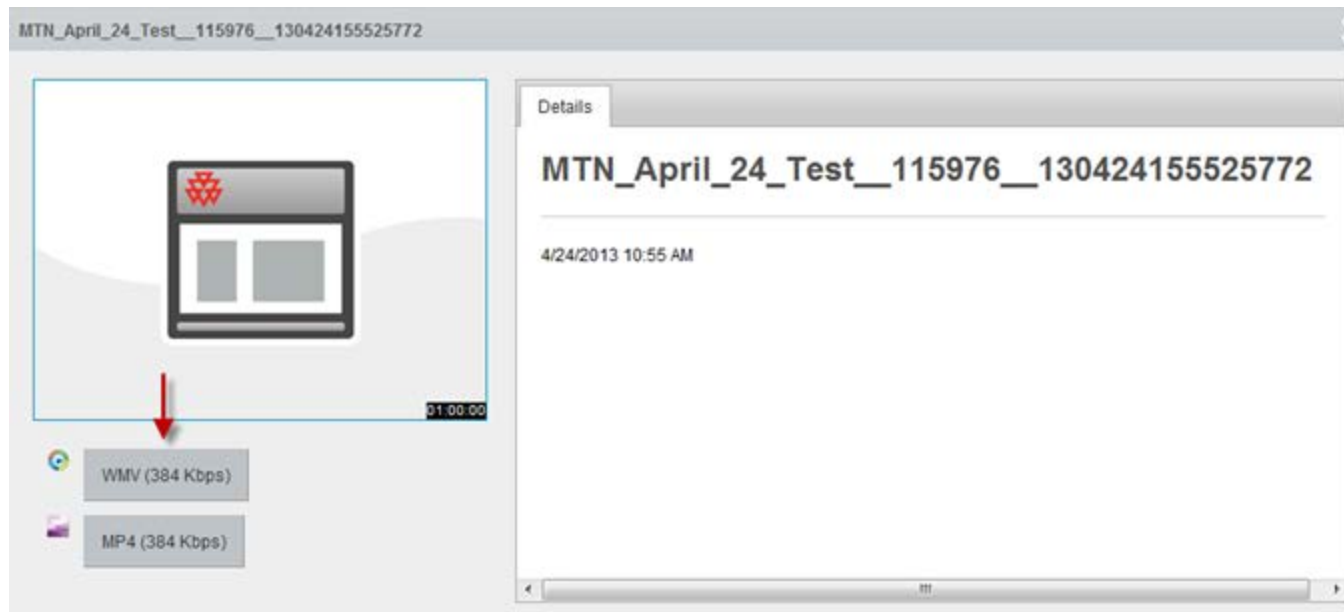

1. In the gray category bar, select MTN

2. If you have trouble getting the grey tool bar to come up on your screen (shown in section a.) to show the MTN logo as shown above with the **red arrow**. Up in the right corner of the screen look for "Tools" and then click on Compatibility View. This should help get the board to come up.

3. The conference will appear Under Upcoming Events once the conference has started. Click on the Conference icon.

4. Select WMV or MP4 to view the file. <mark>This step is only relevant for viewing an archive. The live steams will automatically play after step 4.</mark>

5.

6. Click the X in the upper right corner to close the video clip.

7. Problems viewing from your home computer? The windows media files on Watch2.more.net use port 81. This port is designated by the manufacturer so it won't conflict with the other processes of the service. If you are unable to play the windows media files, your internet provider has port 81 blocked. Please contact your internet provider and ask them to open port 81.
